Subject: Give The Kiddos A Break From The Screen!

Hi [Recipient's Name],

Did you and your curious young builders enjoy my first book “*No More Potholes, Let's Mill & Fill!*”? Well if you did, I have some great news for you! I have just published the second book in the series titled “*Beams Over Streams: Let's Build a Bridge!*”.

If you haven't heard about my first book in the series, it teaches kids about the complex construction projects that parents like you work on everyday at construction and engineering jobs. It can be hard to explain to your kid how an entire bridge is constructed in a way that's easy for them to understand, that's why I created this new and adorable series!

These books aren't just packed with information though, they're beautifully illustrated and written in a way that'll keep even the most fidgety child's attention. Give your kids a break from the screen and show them something that'll inspire them to grow up to be as hardworking and knowledgeable as you are.

You can order your copy of *Beams Over Streams: Let's Build a Bridge!* on Amazon today. Just click on this link: [Beams Over Streams](#)

I hope you enjoy reading it as much as I enjoyed writing it.

Thank you for your support and encouragement on my first book! I look forward to hearing your feedback and seeing your reviews about this one :)

Best,

Scott Jennings, PE

Subject: Mold Your Kids Into Future Craftsmen and Craftswomen!

Hi [Recipient's Name],

Have you and your little ones had the chance to check out my new book, *Beams Over Streams: Let's Build a Bridge!* yet? I appreciated everybody that shared a warm response to the first email so far, and left a review on Amazon. Thanks again! Now, I would like to share with you a little more about the newest book in my series on teaching kids about the interesting world of construction.

At the heart of my stories are the Cathedral Termites, a lively community of builder bugs. They're much like us actually if you think about it; they're hard working and knowledgeable builders who all come together to create complex and functional structures for their community.

Beams Over Streams goes beyond the surface of other children's books about construction and provides a meaningful educational experience, fuels your kids' curiosity, and encourages them to ask questions and understand the world around them.

I would just like to take a second to thank everybody for your continued support! It brings me a lot of joy to see all of your reviews and videos of your kids' reactions to my first book. I'm so happy that I get the chance to share my passion for construction with the next generation.

Join me on this mission to inspire our kids, foster their curiosity, and perhaps guide them towards the path of becoming the craftsmen and craftswomen of the future.

If you haven't already, You can order your copy of *Beams Over Streams: Let's Build a Bridge!* on Amazon today. Just click on this link: [Beams Over Streams](#)

Subject: An Exciting New Experience For Curious Young Builders

Hi [Recipient's Name],

Has your home been buzzing with the delightful stories of the Cathedral Termites from my latest book, *Beams Over Streams: Let's Build a Bridge!?* If you haven't introduced your kids to Ted's story yet, it's time to bring this extraordinary adventure home.

In *Beams Over Streams*, we join Ted, a curious termite, as he navigates the challenge of building a bridge to bring his friends together. This heartwarming tale teaches your kids about teamwork, problem-solving, and the complexities of building a bridge – all in a simple, fun, and engaging way that keeps even the squirmiest of kids entertained.

Through my books, I aim to spark an early interest in construction, fostering a love for creating and understanding how the things that hold our society together are built. This could be the first step towards molding your little ones into the future craftsmen and craftswomen of our world. Isn't it exciting to think that today's bedtime story could be the start of their life-long passion and career?

Your support has made it possible for the Cathedral Termites series to inspire and educate young minds, and for that, I am forever grateful.

If you haven't had the chance yet, you can order your copy of *Beams Over Streams: Let's Build a Bridge!* on Amazon today. Just click on this link: [Beams Over Streams](#)

I can't wait to hear your thoughts and see your reviews on the latest installment in my series!

Best,
