Hero Interactive Funnel Design: This is a simplified version of the “How It Works” interactive graphic that will be displayed further down the page. It’s just a sneak peak to catch the attention of the audience and persuade them to learn more about the process in the more detailed graphic further down. I placed this simplified section first in the instructions because this document is ordered chronologically. However, I would recommend reading the instructions for creating the more detailed “How it works” section first, and then make a simplified hero version. Either way, I have provided instructions for both.

Subheading: What if Your Leads Aren't Weak? Your Sales System is Weak...

Supporting copy:

You know the story: Just had a promising sales call, expecting them to get back to you soon. One week becomes two. Maybe you send an email or two, but you're both busy - but they're so qualified and in need of your solution that there's no way they don't close.

But then that promising sales call cools off because, let's face it, good follow-up takes time - time you don't have.

Forget about hiring an army of workers to manually track and nurture all those leads. That costs a fortune. But ignoring follow-up means leaving money on the table.

Imagine if you had someone working 24/7 to handle every follow-up automatically? Imagine if they worked on weekends and holidays and never forgot to follow up?

With MyMarketingPipeline+, now you can! Our automated follow-up solution handles the heavy lifting, so you can stop worrying about leads going cold and start closing more deals.
